

RAPID QUALITATIVE ANALYSIS

Methods Overview

Rapid Assessment Procedures (RAP) is a validated approach to quickly assess qualitative data without compromising rigor. Rapid qualitative methods offer a practical and efficient way to collect timely qualitative data, especially when quick insights are needed.

Is your research team interested in:

- ✓ Quickly analyzing qualitative data with integrity?
- ✓ Studying a time-sensitive project or a rapidly evolving situation?
- ✓ Speeding up your research data analysis processes?
- ✓ Describing the context where an intervention, practice, or policy is implemented?

What We Do

The Intervention Methods Group at the SDSU HealthLINK Center offers consultation and training to research teams seeking to develop new or adapt existing validated interventions for different populations and settings.
